

WORLD ENVIRONMENT DAY

Little children can make a big difference!

The World Environment Day was celebrated at ISWK with great enthusiasm, where various activities were designed for students to perform from their homes through an e-class programme. The Kindergarten children spoke about saving energy and the Earth's resources. The various ways they could save energy was- by switching off the fan and light when not in use, by not wasting food, using both sides of the paper, etc. They turned into a superhero by going around the house saving one resource at a time. The children proudly spoke about what they have done for the environment. The children were adorned with a colorful crown which they wore during the celebration. They sang a beautiful rendition appreciating the beauty and importance of how to protect our Earth. The theme implores the children to get outdoors, be amidst nature to appreciate its beauty, and to take forward the call to protect the Earth that we share and live on.
