

## WORLD ENVIRONMENT DAY

World Environment Day is the event for positive environmental action and takes place on 5th June every year. This year's theme, 'Ecosystem Restoration' is a global undertaking at a massive scale.

To take forward the call to protect the Earth that we share, the little nature lovers of the Primary Wing presented awe-inspiring assemblies.

Meaningful skits, delightful dances, soulful songs adorned the assemblies and reminded us that we all are a part of nature and we need to cherish this vital relationship.

The nature enthusiasts pledged their support to become agents of change for a positive impact on our environment!

We, the teachers and our students indeed deserve accolades for our efforts to make environment a part of our hearts and minds!
