

## INDIAN SCHOOL AL WADI AL KABIR

<b>Class: VI</b>	<b>Department: ENGLISH</b>	<b>Date of Submission: May 2020</b>
<b>Worksheet No: 6</b>	<b>Topic: Comprehension Passage</b>	<b>Note:</b>

**Q. Read the following passage carefully and answer the questions that follow.**

Coconut is the most important nut in the world. Not only it is one of the biggest of all the nuts but almost all the parts of the tree are useful to man. The coconut tree is an elegant palm-tree growing up to hundred feet high. Its trunk is useful for timber, the leaves are useful for thatching, sap which pours from the cuts made on the young flower spike, can be turned into sugar and when fermented it is converted into vinegar or a strong alcoholic drink. The flesh of the green coconut is used as a vegetable. The milk inside the young nut is relished as a fresh drink. Ropes, bags and brooms are made from the outside dry, fibrous layer which protect the nuts. And lastly, mature nut flesh is dried to be the world's important source of vegetable fats and oils. All this comes from a tree which grows in pure sand.

1. Which is the most important nut in the world?

- (a) Walnut
