

**INDIAN SCHOOL AL WADI AL KABIR**  
**Class VII**, Mathematics **Worksheet- MULTIPLICATION OF INTEGERS**  
**02-07-2020**

OBJECTIVE TYPE (1 Mark)

|      |  |                   |   |                   |   |                             |   |                   |
|------|--|-------------------|---|-------------------|---|-----------------------------|---|-------------------|
| Q.1. | The value of $3 \times (-2) \times (-8)$   |                   |   |                   |   |                             |   |                   |
|      | A  | (-48)             | B | 48                | C | 32                          | D | (-32)             |
| Q.2. | The property used in $[(-3) + (-19)] \times 21 = (-3) \times 21 + (-19) \times 21$ |                   |   |                   |   |                             |   |                   |
|      | A  | Associativity     | B | Commutativity     | C | Identity                    | D | Distributivity    |
| Q.3. | The product of $(-25) \times (-10) \times (-4)$ is                                 |                   |   |                   |   |                             |   |                   |
|      | A  | 1000              | B | -1000             | C | 1                           | D | -100              |
| Q.4. | If $a \times (-1) = (-30)$ , then integer a is                                     |                   |   |                   |   |                             |   |                   |
|      | A  | positive          | B | negative          | C | Either positive or negative | D | None of these     |
| Q.5. | If (-1) multiplied itself 95 times the result will be                              |                   |   |                   |   |                             |   |                   |
|      | A  | 1                 | B | -1                | C | 0                           | D | 95                |
| Q.6. | Which pair of integers does not have product equal to 36                           |                   |   |                   |   |                             |   |                   |
|      | A  | (-4, -9)          | B | (-3, -12)         | C | (1, 36)                     | D | (-6, 6)           |
| Q.7. | $(-43) \times (-99) + 43$ is equal to  |                   |   |                   |   |                             |   |                   |
|      | A  | 4300              | B | -4300             | C | 4257                        | D | -4214             |
| Q8.  | $(-11) \times 11$ is not equal to  |                   |   |                   |   |                             |   |                   |
|      | A  | $11 \times (-11)$ | B | $-(11 \times 11)$ | C | $(-11) \times (-11)$        | D | $11 \times (-11)$ |
| Q9   | The product of (-15), 2 and (-2) is  |                   |   |                   |   |                             |   |                   |
|      | A  | -60               | B | 60                | C | 30                          | D | -30               |
| Q10  | The multiplicative identity for integers   |                   |   |                   |   |                             |   |                   |
|      | A  | Zero              | B | 1                 | C | -1                          | D | Does not exist    |

## SECTION B

Fill in the blanks (1) marks)

|                   |   |
|-------------------|---|
| Q11.              | The product of $(-45) \times 20$ is -----   |
| Q12.              | The product of five negative numbers is -----   |
| Q13.              | The property used in $(-19) \times 125 = 125 \times (-19)$ is -----   |
| Q14.              | The product of 66 and $(-1)$ is -----   |
| Q15               | The product of $2 \times (-3) \times 4 \times (-5)$ -----   |
| SECTION C(3 mark) |   |
| Q16               | A submarine moved from water surface a speed of $-20\text{m}$ per minute. How far is the submarine from the water surface at the end of 7 minutes?  |
| Q17               | Find the product by distributive property:<br>$(-375) \times 104$   |
| Q18               | In a class test containing 10 questions, 4 marks are awarded for every correct answers $(-2)$ marks are awarded for every incorrect answers and 0 for questions not attempted. Manu gets 4 correct answers and 6 incorrect answers what is his total score? |
| Q19               | A shopkeeper earns a profit of ₹ 2 by selling a book and makes a loss ₹ 1 per pen while clearing the old stock. He sold 35 books & 28 pens. He earns profit or loss? By how much?   |
| Q20               | Verify that $25 \times [ 7 + (-3) ] = 25 \times 7 + 25 \times (-3)$   |
| Q21               | Simplify by using property:<br>$(-1487) \times 327 + 487 \times 327$  |
| Q22               | When $a = 15$ , $b = (-3)$ and $c = (-4)$ verify that<br>(1) $a \times b = b \times a$<br>(2) $( a \times b ) \times c = a \times ( b \times c )$<br>(3) $a \times ( b + c ) = a \times b + a \times c$   |
| Q23               | Find by using distributive property : $(-123) \times 87 + (-13) \times 123$   |
| Q24               | A certain freezing process requires that the temperature be lowered from $30^{\circ}\text{C}$ at the rate of $3^{\circ}\text{C}$ every hour. What will be temperature after 8 hours?  |
| Q25.              | Find by using property: $25 \times (-6050) \times 4$  |

## ANSWERS

|         |                   |                 |                   |                |               |
|---------|-------------------|-----------------|-------------------|----------------|---------------|
| ANSWERS | 1. A              | 2. D            | 3. B              | 4. A           | 5. B          |
|         | 6. D              | 7. A            | 8. C              | 9. B           | 10. B         |
|         | 11. (-900)        | 12. Negative    | 13. Commutativity | 14. (-66)      | 15. 120       |
|         | 16. 140 m<br>down | 17.<br>(-39000) | 18. 4             | 19. ₹42 profit | 20.           |
|         | 21. (-327000)     | 22.             | 23. (-12300)      | 24. 6°C        | 25. (-605000) |
