(a) Dividing the weight in Kg by the square of the height

(b) Dividing the height by weight

(c) Dividing the weight by height

(d) Adding height to the weight of the person

10. Assume there are four families in a country. The average per capita income of these families is Rs. 5000. If the income of three families is Rs. 4000, Rs. 7000 and RS. 3000 respectively. what is the income of the fourth family?

(a) Rs 7500

(b) Rs 3000

(c) Rs 2000

(d) Rs 6000

II. FILL IN THE BLANK

1. The number of deaths of children less than one year of age per 1000 live births is referred as _____.

Ans. Infant Mortality Rate

2. Human Development Report is published by _____.

Ans. UNDP

3. Different persons could have _____ notions of a country's development.

Ans. different as well as conflicting

4. The average income is also called _____.

Ans. Per capita income.

5. The development that meets the needs of the present without compromising the needs of the future generation is known as _____.

Ans. Sustainable development

6. Countries with higher income are _____ than others with less income.

Ans. More developed

III. WRITE TRUE / FALSE

1. Per Capita Income is calculated in Pounds for all countries.

Ans. False

2. Nearly one-third of the country is overusing their groundwater reserves.

Ans. True

3. GDP is the total money value of all intermediate goods and services produced during a particular year.

Ans. False

4. Development of a country can generally be determined by its average literacy level.

Ans. False

5. Human Development Index compares countries based on Educational level, Health status and Per capita Income.

Ans. True

IV. ASSERTION AND REASON

In the question given below, there are two statements marked as Assertion (A) and Reason (R). Read the statements and choose the correct option:

1. **Assertion (A):** A country that was extremely rich in natural resources has mainly relied on oil extraction for revenue generation for several centuries. However, the scientists predict that the country may become poor in the future if other means of generating income are not devised.

Reason (R): Oil is a non-renewable resource, and it is likely to get exhausted if not used judiciously.

Options:

- A. **Both A and R are true and R is the correct explanation of A.**
- B. Both A and R are true but R is not the correct explanation of A.
- C. A is true but R is false.
- D. A is false but R is true.

2. **Assertion (A):** A high average income is not an indicative of the over all well-being or human development in a country.

Reason (R): Average income does not cover indicators like level of literacy rate, health facilities and public facilities in a country.

Options:

- A. **Both A and R are true and R is the correct explanation of A.**
- B. Both A and R are true but R is not the correct explanation of A.
- C. A is true but R is false.
- D. A is false but R is true.

3. **Assertion (A):** Non-renewable resources are abundant in nature.

Reason (R): Non-renewable resources are those which will get exhausted after years of use.

Options:

- A. Both A and R are true and R is the correct explanation of A.
- B. Both A and R are true but R is not the correct explanation of A.
- C. A is true but R is false.
- D. **A is false but R is true.**
