

<b>CLASS VII</b>	<b>DEPARTMENT: COMPUTER SCIENCE</b>	<b>YEAR 2026-2027</b>
<b>HOLIDAY HOMEWORK</b>	<b>TOPIC: Real-Life Examples of AI Domains</b> <b>Date of Submission: On or before 23-07-26</b>	

## Artificial Intelligence Portfolio Project “Real-Life Examples of AI Domains”

Dear Students,

Artificial Intelligence (AI) is used in many areas of our daily lives. Different AI systems work in different ways depending on the type of task they perform.

For this holiday homework, you will explore the **three major AI Domains** and identify real-life examples for each domain.

### Objective

This activity will help students:

- Understand different AI domains
- Observe AI applications around them

### Submission Details

**Students must ensure that the following points are completed before submission:**

- Submit as portfolio file (on A4 sheets).
- Should mention your name, roll number, class and division on the first page.
- Minimum 3 real-life examples written for each domain (Data science, CV , NLP).
- Explanation provided for each example
- Relevant pictures/drawings/paste-ups added
- Only Handwritten format is accepted.
- Neat presentation is important.

### Final message

AI is already around us — in our phones, homes, schools, hospitals, and even entertainment apps.

Observe carefully and discover how AI is becoming a part of everyday life!
