 - (a) comets
- (b) constellation
 - (c) satellite
- (d) asteroids

II. Mihir is doing his school project on the solar system. Help Mihir to identify them with the help of the given clues.

- a) I am a .
- **b)** I am a burning ball of
- **c)** I am the _____ of
- solar system.
- **d)** Life on Earth depends on me. I am the .

fire	star	Sun	centre

- **a)** I am the _____
 - Planet.
- **b)** I have water and

____ that contains oxygen.

is my natural satellite.

I am the

blue **Earth** air moon

- **a)** I am the_____ farthest planet from
 - sun.
- **b)** I have spectacular $__$ around me .
- **c)** I am _

rings sixth Saturn

a) I am covered with

reddish _____ and

b) I am also called as the

_____ planet.

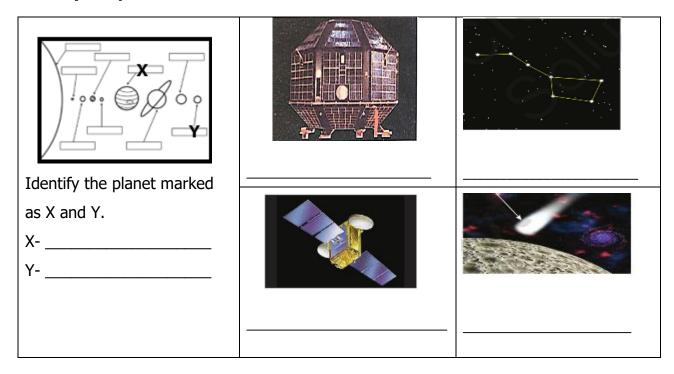

c) I am _

rock red Mars sand

III. Match the following:

Column A	Column B		
1. Planets	a) bright ball of light with long tail		
2. Constellation	b) heavenly bodies that move around the planet		
3. Satellites	c) small heavenly bodies made up of rocks that revolve around the sun

IV. Identify the pictures and name them.

V. Read the paragraph given below and answer the question that follows.

The sphere-shaped Earth is the third planet in the solar system. The availability of air, water, and gases required for survival makes the Earth the only planet sustaining life. The existence of water makes the Earth appear blue when viewed from outer space, earning it the nickname "Blue Planet." We must take care of Earth because life is impossible on any other planet. The planet has all the necessary amenities and everyone can live there due to its moderate climate.

1.	The shape of the Earth is and and
	which is required for human survival.
2.	Why is Earth called as the blue Planet?
	Ans:
