- a. tadpole                      b. fry                      c. spawn                      d. embryo

**II. Define the following.**

1) Yolk: \_\_\_\_\_

---

---

2) Fry: \_\_\_\_\_

---

---

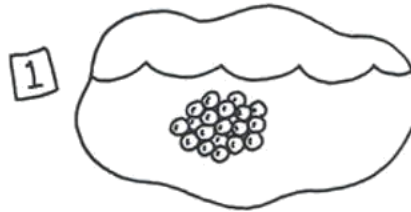

3) Spawn: \_\_\_\_\_

---

---

**III. Read the poem about the life cycle of frog and complete the questions that follow.**

Frog just laid a little egg,  
Little egg, little egg.  
Frog just laid a little egg,  
And now a tadpole is hatched.

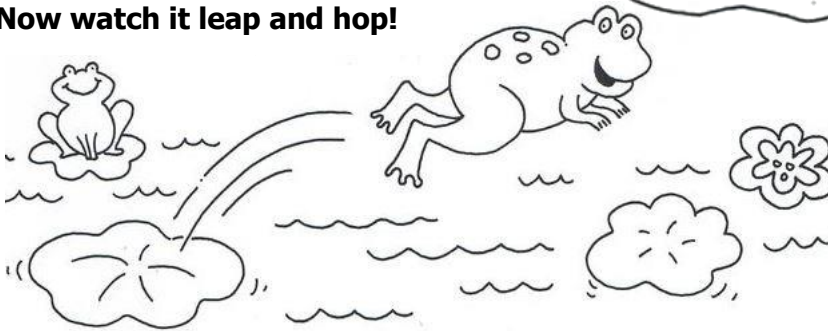

Tadpole looks just like a fish,  
Like a fish, like a fish.  
Tadpole looks just like a fish,  
It swims and starts to grow.

Tadpole now is growing legs,  
Growing legs, growing legs.  
Tadpole now is growing legs,  
Its body is getting big.

Tadpole is grown into a frog,  
To a frog, to a frog.  
Tadpole is grown into a frog,  
Now watch it leap and hop!

**Circle the right option in the following sentences.**

1. Frogs laid eggs in the (**water/land**).
2. Do you think baby frogs can swim? (**Yes/No**). Then in the water, how do they breathe through? (**nose/gills**)
