

# INDIAN SCHOOL AL WADI AL KABIR

DEPARTMENT OF EVS [2025 – 2026]

LESSON: **SENSE ORGANS**

**WORKSHEET-2**

RESOURCE PERSON: MANJULA HARINARAYANAN

NAME: \_\_\_\_\_ CLASS: IV SEC: \_\_\_\_\_ DATE: \_\_\_\_\_

## I. Observe the pictures given and answer the questions that follow.

1. Raj is reading his favourite book, which he got as a birthday gift.

(a) Is this the right reading posture?

(b) What happens when you read a book by lying down or keeping it too close to your eyes?

(c) Can you suggest the right reading posture to him?

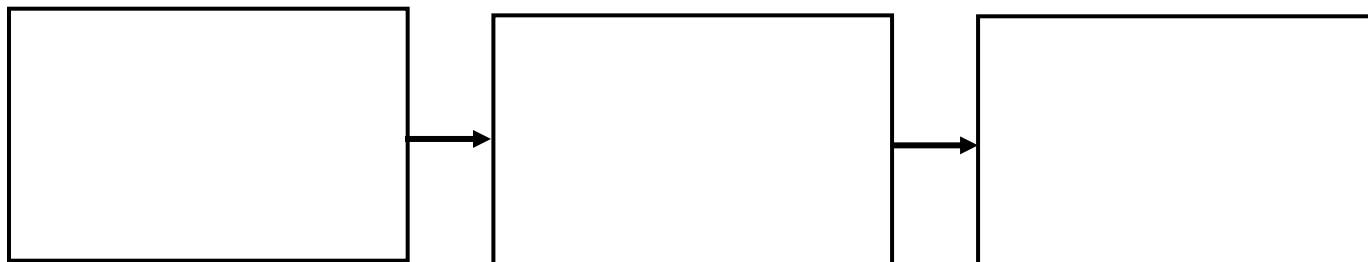

2. Imagine you are in class, and your friend next to you suddenly shouts loudly.

(a) What do you think happens to your ears when someone shouts loudly?

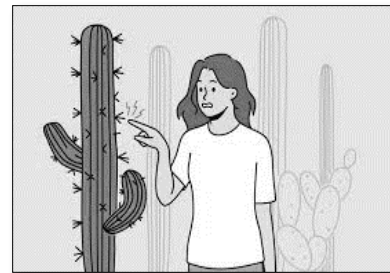

(b) What should we do to protect our ears?

(c) How do our ears work? Complete the flowchart given below.

## II. Case Study: Read the following case studies and answer the questions that follow.

**1. The Curious Kid:** Aaliya loves to explore nature. One day, while playing in the park, she touched a thorny plant and got a small cut on her finger.

a) Which sense organ alerted Aaliya to the pain?

\_\_\_\_\_

b) How should Aaliya take care of the cut to prevent infection?

\_\_\_\_\_

c) Why is it important to be cautious while exploring?

\_\_\_\_\_

**2. The Bright Sun:** During a sunny day at the beach, Alex was playing without sunglasses.

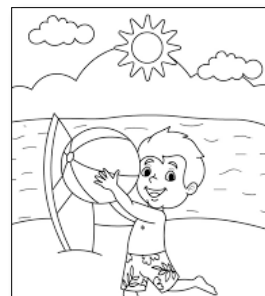

a) Which sense organ is affected by the bright sunlight?

\_\_\_\_\_

b) What should Alex do to protect his eyes while playing outside?

\_\_\_\_\_

\_\_\_\_\_

**3. The Strange Smell:** Evelyn noticed a strange smell coming from the kitchen while her mom was cooking.

a) Which sense organ helped Evelyn detect the smell?

\_\_\_\_\_

b) What should Evelyn do if she smells something unusual, especially if it's a potential hazard like natural gas?

\_\_\_\_\_

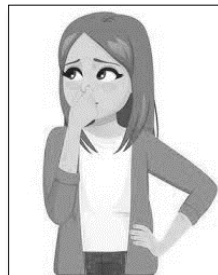

\_\_\_\_\_

c) Give any two ways by which she can take care of this sense organ.
