

INDIAN SCHOOL AL WADI AL KABIR

Class: VII	Department: Computer Science	Year: 2026-2027
Worksheet Practical	Subject: Computer Science Topic: Textual Coding	

Practical Activity Question

1) write a simple python program to do the arithmetic operations using AI connect platform.

```
a = int(input("enter the first number"))
b = int(input("enter the second number"))
c = a+b
d = a-b
e = a*b
f = a/b
print("The addition of two numbers is", c)
print(" The difference of two number is", d)
print("The product of two numbers is", e)
print("The quotient is ", f)
```

Output:

```
enter the first number
12 Enter
-----
enter the second number
10 Enter
-----
The addition of two numbers is 22
The difference of two number is 2
The product of two numbers is 120
The quotient is 1.2
```

2) Write a simple python program to find the area and perimeter of a rectangle

```
L = float(input("enter the first number"))
B = float(input("enter the second number"))
Area= L*B
Perimeter=2*(L+B)
print("The area of the rectangle is", Area)
print("The perimeter of the rectangle is", Perimeter)
```

Output:

enter the first number

6.8

Enter

enter the second number

7.9

Enter

The area of the rectangle is 53.72

The perimeter of the rectangle is 29.4
